

	<b>SEI CAPSTONE PROJECT (PROJECT 4)</b> <b>Full-stack React Application</b> <b>CODE REVIEW</b>		
Team Name			
Student Names			
Metro			
All criteria are minimum requirements and all must be met in order to pass.		<a href="#">Link to Project 4 Requirements</a>	
Planning & Presentation Requirements		Local Inst:	
Planning		Complete?	Comments (optional)
A Pitch-Deck for the project			
A "public" Trello board used for the project's planning			
"Ice Box", "Current/MVP" & "Completed" Trello lists for holding User Story cards			
User stories follow the "As a <user role>, I want <feature>, because <reason>" format (<reason> is optional if it's blatantly obvious)			
Trello contains a "Wireframes" list with wireframes for the app's main functionality			
Trello contains an "ERD" list with an Entity-Relationship-Diagram for the app's data model			
Presentation		Complete?	
Project introduced by paraphrasing the README			
Deployed app launched by clicking the link in the README			
Signed up a new user, then immediately logged out			
App's features demonstrated using the "preferred" user			
Showed the code for the "main" Mongoose model, favorite Express controller, favorite React component & client-side routing			
Shared their key learnings/takeaways			
Demonstrated full CRUD data operations			
Project Assessment			
Project assessments will be tracked in the summary			
Technical Requirements		Global Inst:	
		Complete?	Comments (optional)
App is a working MERN-stack (or instructor approved) app			
Token-based authentication implemented (sign-up, login & logout)			
App connects to PostgreSQL, not the default SQLite3 database			
Authorization implemented with navigation dynamically responding to user login status.			
App is appropriately scoped. one or more of the following should be implemented: consuming an API; admin user functionality; real-time communications, etc.			
App has the 4 CRUD operations implemented somewhere within its features			
The working app is deployed on Heroku.			
Necessary Deliverables		Global Inst:	
		Complete?	Comments (optional)
Frequent commits date back to the very beginning of the project. Commit messages should be in the present tense.			
Full-stack app is deployed on Heroku			
A README.md file with these sections:			
App Title (contains a description of what the app does and optional background info)			
Screenshot(s): App's landing page and any other screenshots of interest			
Technologies Used: List of the technologies used			
Getting Started: Includes a link to the deployed app, Trello planning & Pitch-deck			
Next Steps: Planned future enhancements (icebox items).			
Summary			
Does project meet minimum requirements and is passing?			
Overall Comments
